PROFESSIONAL SUMMARY

Data and business analytics professional with an M.S. in Data Science and Analytics (GPA 3.80) and experience supporting enterprise reporting, data quality, SDLC, testing, AI initiatives, and stakeholder decision-making. Skilled in SQL, Python, Excel, Power BI, Tableau, JIRA, and Confluence, with hands-on experience collecting, cleaning, validating, analyzing, and presenting data. Strong foundation in Agile delivery, KPI reporting, requirements documentation, process improvement, and human validation of AI-generated outputs.

CORE SKILLS

Analytics & Reporting: SQL, Python, Excel, Power BI, Tableau, Data Cleaning, Data Validation, KPI Reporting, Data Visualization
Business & Delivery: Requirements Gathering, Stakeholder Collaboration, SDLC, Agile/Scrum, UAT, Functional Testing, Process Improvement, Documentation

Technology & Tools: JIRA, Confluence, Git, AWS, Playwright, Jenkins, Allure, CI/CD

AI & Data Science: Machine Learning, Predictive Modeling, LLM Evaluation, Prompt Engineering, AI Output Validation, Statistical Analysis

PROFESSIONAL EXPERIENCE

Data Analyst | Techpro Solutions Inc.

Jun 2026 - Present

- Collect, clean, transform, and analyze enterprise data using SQL, Excel, and Python to support recurring reporting and business analysis.
- Develop and maintain Power BI dashboards and automated reports that help business users monitor performance, trends, and operational outcomes.
- Perform data validation, reconciliation, and quality checks to improve the accuracy and reliability of analytics outputs.
- Prepare structured datasets for AI and machine learning initiatives and support downstream analytical workflows.
- Translate analytical findings into clear visualizations, summaries, and recommendations for technical and non-technical stakeholders.
- Partner with business and technical teams to clarify reporting needs, define data requirements, and deliver fit-for-purpose analytical outputs.

Data & AI Intern | BoardX

Jul 2025 - Jun 2026

- Gathered user feedback, validated AI-generated outputs, and documented findings to support product and workflow improvements.
- Performed functional testing, identified defects, and documented system requirements and expected behavior for engineering teams.
- Collaborated with engineering and product stakeholders on AI-enabled product improvements and issue resolution.
- Researched LLM behavior, prompt engineering, AI agents, and web crawling; applied human review to assess response relevance and quality.

Research Assistant | Ferris State University

Jun 2024 - May 2025

- Collected, cleaned, validated, and analyzed research datasets using Python and R for statistical and predictive analysis.
- Developed predictive models and prepared dashboards, visualizations, and reports to communicate research findings.
- Automated data preprocessing tasks with Python, reducing preprocessing time by approximately 30%.
- Collaborated with faculty and research teams to document methods, interpret results, and support publication-related deliverables.

Software Engineer | MSYS Technologies

Aug 2022 - Aug 2023

- Supported SDLC and Agile delivery activities, including requirements review, functional testing, defect tracking, and release support.
- Used JIRA and Confluence to document requirements, track issues, maintain test evidence, and coordinate work across technical teams.
- Developed and optimized Python/Playwright automated tests integrated with Jenkins CI/CD and Allure reporting.
- Improved automation execution efficiency by approximately 30% and increased test coverage by approximately 20%.

SELECTED PROJECTS

Generalized Inference for the Multivariate Youden Index | Python, SPSS, Statistical Analysis

- Prepared and analyzed research data, applied statistical methods, validated results, and supported research documentation and publication activities.

HPE GreenLake Cloud Platform | Python, Playwright, Jenkins, Allure, CI/CD

- Supported automated functional and regression testing, documented defects and test results, and integrated test execution into CI/CD workflows.

EDUCATION

Master of Science in Data Science and Analytics | Ferris State University | May 2025 | GPA: 3.80

Bachelor of Technology in Mechanical Engineering | JNTU Kakinada | 2016

ADDITIONAL STRENGTHS

Data quality and controls • Dashboard development • Statistical analysis • Source data validation • AI-assisted analytics • Human validation • Cross-functional communication • Leadership-ready reporting
